

Effective English Presentations

Presentation skills for scientific meetings - communicate your know-how.

Responsable : Dr Pascaline Faure

Public et prérequis

This workshop is aimed at clinicians wishing to obtain the essential presentation skills needed to make an impact and communicate confidently.

Objectifs

- Learn about effective presentation planning techniques, using slides and language effectively, performance style and delivery as well as handling questions and answers.
- Participants will obtain an understanding of concise writing for clear communication of key messages and be prepared for different types of presentations. Poster, congress, or round table meetings

Contenus

Jour 1

Preparation

- What do I need to achieve?
- Where will the presentation take place? (congress, poster, meeting).
- Who will be listening and what are their needs and interests?
- Write your story: Capture, key message, supporting data, end with a bang.

Illustration

- Slide writing tips that enhance your presentation.
- Design techniques for effective slides
- Less is More - The KISS principle.
- Using pictures, graphs and numbers.
- *Practical workshops*
